

## CLEANING ADVICE

### GripFactory PolyGrip product range

Products from the GripFactory PolyGrip product range are extremely durable and virtually maintenance-free. To maintain the maximum slip resistance and for a neat appearance, we recommend the PolyGrip products to be cleaned regularly or have them cleaned.

The frequency of this cleaning depends on local conditions and usage. In general, scrubbing with a stiff brush and warm (soap) water is sufficient to remove most dirt. You can remove more stubborn dirt with a high-pressure cleaner.

You can use heavy cleaning agents without affecting the surface of the relevant PolyGrip product. If you wish to use chemicals for cleaning, we recommend that you first perform a test.

In addition, we advise you to annually check the effectiveness of the mechanical fixation and / or glue.
